

COMBAT CARBINE STOCK (CCS)

The Maxim Defense Combat Carbine Stock (CCS) has the same design features, materials selection, and durability as our venerable CQB stocks.

It's for those who want a standard length carbine length stock, but with more durability and features. It boasts a full length cheek weld even when the stock is at full extension. Plus, you continue using your existing buffer & spring and bolt carrier group.

Featuring solid attachment, quick deployment, 2 built-in sling mounts, and 3-positions of adjustment, the Maxim Defense CCS is perfect for your short barrel or full length carbine.

FEATURES

- » One-handed rapid deployment
- » Utilizes MILSPEC carbine buffer and spring
