

DSX SERIES

MSX *SUPPRESSORS*
BY MAXIM DEFENSE

The DSX Series is the best choice for your PDX or other firearms with barrels under 10.3" whether select fire or semi-auto. All you have to do is decide what mount you need.

We've tested the DSX Series successfully to a belt-fed machine gun combat load of 800 rounds. Yeah, it survived just fine. The 17-4

stainless steel core with M-Kore Technology handles anything you throw at it, and the Grade 5 titanium tube and mount back it up. The DSX series has a retention ring for added security between the tube and mount. We haven't had any tubes back off the mount without it, but the peace of mind is nice.

FEATURES

- » M-Kore™ Technology
- » Secondary retention ring
- » Full-auto rated with no barrel length restrictions
- » Integrated carbon cutters for easy suppressor tube cleaning
- » Left-hand threads from core to mount
- » User serviceable
- » Disassembles with common tools
- » Military grade materials
- » UTM safe
- » Increase reliability and service life of firearm due to low gas blow back and low gain in host firearm cyclic rate compared to traditional suppressor designs
