

# GEN:7 CQB-HRT STOCK

COLORS

Like the Gen:7 CQB Stock, the Gen:7 HRT is built for comfort and durability for real-world use. The main difference is the addition of two extra QD sling mounts on each side of the cheek extension. As such, to deploy the HRT stock, the adjustment lever must be engaged. This is to prevent the stock from extending under the weight of a slung rifle.

With 4 total positions you can adjust for maximum comfort and multiple scenarios. Rapid deployment, purpose driven materials, and the functionality you need, the Maxim Defense CQB Stock is simply the most thought out, versatile, and durable CQB stock on the market.

The Gen:7 is for those who want a sleeker profile, eliminating the side sling swivel attachment points from the housing. Instead, the Gen:7 comes with our ambidextrous sling mount already installed.

## FEATURES

- » Decreases overall length of PDW's
- » Utilizes MILSPEC bolt and bolt carrier group
- » Easily installs on MILSPEC AR15 lowers
- » Extended cheek weld
- » Knurled collapse button
- » Textured butt plate
- » Ambidextrous QD sling mounts
- » Military grade materials
