

MS SERIES

MSX SUPPRESSORS BY MAXIM DEFENSE

MS:9/MS:45

The MS:9 and MS:45 are built for those who want or need modularity in their pistol caliber platforms. The freedom of choice is nice, but sometimes it's a necessity. The MS:9 and MS:45 allow you to configure them short or long, depending on your application.

Equally at home on pistols or PCC's, they have no barrel length restrictions regardless of your rate of fire. Plus, they are easy to disassemble with common garage tools. Combine that with stainless steel baffles and you have no excuse to not clean the suppressor when needed.

FEATURES

- › Modular - can be assembled in standard and long configurations
- › No barrel length restrictions
- › Rifle and pistol rated
- › User serviceable
- › Disassembles with common tools
