The PDX:SD is the newest addition to our SDX suppressor-tuned firearm lineup. To continue to dominate the short firearm market we've engineered a shorter and larger diameter M-Kore equipped DSX suppressor for the PDX. After finely tuning at the factory, the PDX and suppressor together deliver the most effective sub-compact firearm platform that shoots full-powered cartridge loads from an ultra-compact platform, while still being hearing safe.

FEATURES

- » PDX specific silencer featuring M-Kore™ Technology
- » Removable suppressor with no barrel length restrictions
- » Military grade materials
- » Purposefully built for each available caliber
- » Integrated carbon cutters for easy suppressor tube cleaning
- » User serviceable
- » Disassembles with common tools
- » Increase reliability and service life of firearm due to low gas blow back and low gain in host firearm cyclic rate compared to traditional suppressor designs

	PDX:SD
CALIBERS	5.56 NATO, 7.62x39, .300BLK
BARREL LENGTH	5.5 inches
OVERALL LENGTH	23.75 inches (collapsed)
