

# PRS SERIES

**MSX SUPPRESSORS**  
BY MAXIM DEFENSE

**M-KORE**  
TECHNOLOGY

The PRS series is a serious contender when it comes to the strength-to-weight ratio of a silencer. It's at home on hunting, match, and even semi-auto rifles. It's our lightest silencer with all the benefits of M-Kore Technology with no sacrifice to sound reduction.

The PRS features a 7075 aluminum tube, core, and mount with a Grade 5 titanium thread insert to prevent galling. The use of aluminum is perfect for light to mid-duty use, plus, it keeps the price very affordable.

## FEATURES

- » M-Kore™ Technology
- » For use on barrels 16" or longer
- » Integrated carbon cutters for easy suppressor tube cleaning
- » Left-hand threads from core to mount
- » User serviceable
- » Disassembles with common tools
- » Increase reliability and service life of firearm due to low gas blow back and low gain in host firearm cyclic rate compared to traditional suppressor designs
