

5.56 NATO

62gr

Tumble Upon Impact (TUI®)

MADE IN THE USA

FEATURES

- » Non-lead, Solid Copper Spun (SCS®) projectile
- » Superior penetration
- » Exceptional accuracy and terminal performance
- » Match-grade ammunition

CALIBER	GRAIN	PROJECTILE	TEST BARREL	BARREL VELOCITY	SIZE	QUANTITY
5.56 NATO TUI®	62	Solid Copper Spun (SCS®)	24" 1:7"	3200 FPS	OAL: .9521" COAL: 2.255"	20/box 500/case

The 5.56 SCS® TUI™ rifle ammo is a match grade, solid copper projectile, uniquely developed to Tumble Upon Impact™ (TUI™) and provide decisive terminal effects in any situation. Designed with military grade hard primers. Our #1 priority is for the safety of our customers. Slam fire is a slim chance but we have experienced this in our testing.

FOR THE HUNT

Designed to maximize soft tissue trauma and stop your quarry fast, this (TUI™) long distance rifle ammo has the weight retention to penetrate deeply into vital organs. The Tumble Upon Impact™ (TUI™) action delivers a fast, humane kill. Ideal for varmint control and hunting small to medium game, the uniquely developed, patented spitzer shape delivers superb precision, even at longer ranges.

HIGH-PERFORMANCE

The 5.56 NATO SCS® (TUI™) round is designed for light recoil with no sacrifice in velocity. Because of their solid copper spun construction, these bullets can be used wherever lead projectiles are prohibited for sport shooting. These bullets provide a definite ballistic advantage to ensure you get the most from every shot.

SUPERIOR IN LAW ENFORCEMENT AND SECURITY

The 5.56 SCS® (TUI™) is also a great self-defense round. If you own a rifle such as the AR-15 for defense purposes, this ammunition is your ideal choice. In a critical situation, you can't afford to think twice. Ideal for law enforcement as well, the 5.56 SCS® (TUI™) with its patented design to Tumble Upon Impact™ (TUI™), ensures maximum tissue damage from a single round.

Manufactured for Maxim Defense® by Fort Scott Munitions®. A Velocity Manufacturing, LLC brand
Federal Patent Nos.: 9541362 & 9746296
