

# 8.6 BLACKOUT

235gr

Tumble Upon Impact (TUI®)

MADE IN THE USA

## FEATURES

- » Non-lead, Solid Copper Spun (SCS®) projectile
- » Exceptional accuracy and terminal performance
- » Superior penetration
- » Match-grade ammunition

CALIBER	GRAIN	PROJECTILE	TEST BARREL	BARREL VELOCITY	SIZE	QUANTITY
8.6 Blackout	235	Solid Copper Spun (SCS®)	12" 1:3"	1600 FPS	OAL: 1.965" COAL: 2.650"	20/box 200/case

From the tree stand to the shooting mat, the 8.6 Blackout TUI™ boasts unparalleled ballistic performance. The lead free Tumble Upon Impact™ (TUI™) design leaves devastating wound channels resulting in clean, ethical kills, and our CNC machined Solid Copper Spun (SCS®) bullets are guaranteed to hit your target time and time again.

## UNRIValed PERFORMANCE

The multi-patented Tumble Upon Impact™ (TUI™) design was built with the hunter in mind. The projectile is designed to punch through hard objects such as bone, but once it comes into contact with soft tissue, it begins tumbling immediately resulting in massive wound channels. The hydro-static shock caused by the tumbling projectile is enough to disrupt and/or shut down surrounding organs, providing you with a clean, ethical kill.

## BALLISTIC EXCELLENCE

When you need to really reach out and touch something, the CNC machined, Solid Copper Spun (SCS®) bullets are right on the mark. Each projectile is individually machined out of solid copper bar stock. When loaded, these rounds are guaranteed to be within + or - .2 of a thousandth, giving you the quality of hand loaded munitions inside a factory round.

Manufactured for Maxim Defense® by Fort Scott Munitions®. A Velocity Manufacturing, LLC brand  
Federal Patent Nos.: 9541362 & 9746296
