

DS SERIES

The DS Series is closely related to the DSX. Tough as hell, extremely quiet, and quite possibly the most enjoyable shooting experience you've had thanks to the M-Kore Technology. The DS is what we recommend when you're not running anything below a 10.3" barrel, no matter what torture you put it through.

The main differences from the DSX are the absence of the secondary tube retention ring and the use of Grade 9 titanium on the tube instead of Grade 5. Grade 5 titanium is much more expensive, and it simply isn't needed in the DS series. So why pay extra for it?

FEATURES

- » M-Kore™ Technology
- » Full-auto rated for lengths 10.3" or longer
- » For use on barrel lengths 10.3" or longer
- » Integrated carbon cutters for easy suppressor tube cleaning
- » Left-hand threads from core to mount
- » User serviceable
- » Disassembles with common tools
- » Military grade materials
- » UTM safe
