SDX RFLX *PISTOL*

The SDX RFLX is Maxim Defense's next-gen integrated suppressed weapon system. Chambered in .300 Blackout and built on the proven SDX 508 platform, this rifle is engineered as a complete solution for superior performance. At its core is our M-Kore™ technology and new RFLX chamber design, a **true over-the-barrel suppressor** that maintains a compact footprint by extending rearward over the barrel. The result is a system that's optimized for maneuverability without sacrificing balance, accuracy, or reliability.

The RFLX delivers **129 dB at the shooter's ear with subsonic ammunition,** while a tuned gas system minimizes blow-back and enhances longevity. Built for tactical use, defense, and serious shooters, the **SDX RFLX offers exceptional handling and rugged durability in one tight, streamlined package.**
