

SDX SERIES

MSX SUPPRESSORS
BY MAXIM DEFENSE

 **M-KORE**
TECHNOLOGY

The SDX series features the PDX, MDX:508, and MDX:510 firearm platforms combined with our tough-as-nails DSX suppressor. These suppressed firearm systems are tuned for every caliber and barrel length available. Simply threading on a silencer to a firearm makes it quieter, but when you're looking for an optimal shooting experience you must treat your firearm as a system.

It delivers an extremely soft shooting experience while exposing very minimal gas to the shooter. Once you experience our SDX line, you'll never want a plug and play solution again.

FEATURES

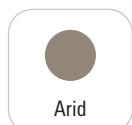

- » DSX-D suppressor featuring M-Kore™ Technology
- » Removable suppressor with no barrel length restrictions
- » Military grade materials
- » Purposefully built for each available caliber
- » Integrated carbon cutters for easy suppressor tube cleaning
- » User serviceable
- » Disassembles with common tools
