

PDX SD

AEG AIRSOFT RIFLE

The **Maxim Defense PDX-SD AEG Airsoft Rifle** delivers compact handling and aggressive styling inspired by the original PDX-SD platform. Built as a 1:1 licensed replica by Vega Force Company, this AEG pairs rugged materials with advanced electronics to create a compact, high-performance airsoft solution.

Its integrated mock suppressor houses the battery, maintaining the ultra-short profile while preserving balance and maneuverability. Internally, the VFC Avalon V2 gearbox and GATE Aster MOSFET provide **programmable performance, smooth cycling, and dependable operation**—ideal for CQB environments and fast-paced gameplay.

FEATURES

- » 1:1 licensed Maxim Defense PDX-SD replica by Vega Force Company
- » CNC-machined aluminum and steel construction
- » Hard anodized finish for durability and realism
- » Compact CQB-focused configuration
- » Battery housed in mock suppressor (11.1V butterfly pack, T-plug)
- » VFC Avalon V2 gearbox with reinforced internals
- » GATE V2 Aster MOSFET for advanced fire control
- » Quick-change spring system
- » Long-type neodymium high-torque VFC motor
- » Compatible with most AR-style airsoft magazines
