

MD:15

DUTY PRECISION

The **Maxim Defense MD15 Duty Precision** is designed and engineered for shooters who demand repeatable accuracy, stability, and performance at distance. At its core is an **18" precision barrel, optimized for consistency and longevity**, paired with the Magpul PRS precision stock for a rock-solid shooting platform in both prone and supported positions. The rifle is finished with a Maxim QD flash hider, which also functions as an effective muzzle brake, providing recoil mitigation and quick compatibility with suppressors and muzzle devices.

Chambered in both 6mm ARC and 5.56 NATO, the MD15 Duty Precision delivers a flat trajectory, high ballistic efficiency, and strong downrange performance — making it an **ideal choice for precision shooters and hunters alike**. Built from premium materials and tuned for reliability, the MD15 Duty Precision provides exceptional control, durability, and confidence, whether you're pushing steel at distance or working in the field.
