QUANTUM SERIES

MSX SUPPRESSORS BY MAXIM DEFENSE

QUANTUM 22

Introducing the MSX Suppressors Quantum Series by Maxim Defense. Built on proven MSX suppressor technology, the Quantum Series has been re-engineered specifically for advanced 3D metal printing, enabling optimized internal geometry, reduced weight, and exceptionally compact designs.

Fully 3D printed from titanium, the Quantum Series delivers an exceptional balance of strength, durability, and lightweight performance. Designed for .22 LR platforms, each suppressor combines advanced manufacturing with a streamlined profile to deliver impressive sound suppression in a compact, efficient package.

Available in multiple configurations, including the Quantum 22K and Quantum 22 NANO, the series offers versatile solutions for shooters seeking premium rimfire suppression with the performance and engineering expected from Maxim Defense.
