

QUANTUM SERIES

MSX **SUPPRESSORS**
BY MAXIM DEFENSE

QUANTUM 5.7

Introducing the MSX Suppressors Quantum Series by Maxim Defense. Built on proven MSX suppressor technology, the Quantum Series has been re-engineered specifically for advanced 3D metal printing, enabling optimized internal geometry, reduced weight, and exceptionally compact designs.

Fully 3D printed from titanium, the Quantum Series delivers an exceptional balance of strength, durability, and lightweight performance. Engineered for 5.7 platforms, the Quantum suppressor combines advanced manufacturing with a streamlined profile to deliver effective sound suppression in a compact, efficient package.

Designed with Maxim Defense's commitment to innovation and performance, the Quantum Series brings advanced suppressor technology to 5.7 platforms, delivering a lightweight, durable solution for shooters seeking premium suppression without unnecessary bulk.

FEATURES

- » Fully 3D-printed titanium construction
- » Ultra-lightweight design
- » 1/2-28 & M10x1 direct thread mounts
- » No barrel length restrictions
- » Durable Cerakote finish
- » Designed for 5.7 platforms
