

QUANTUM 22K

QUANTUM SERIES

QUANTUM 22K

Introducing the MSX Suppressors Quantum Series by Maxim Defense. Built on proven MSX suppressor technology, the Quantum Series has been re-engineered specifically for advanced 3D metal printing—allowing for optimized internal geometry, reduced weight, and exceptionally compact designs.

Fully 3D printed from titanium, the Quantum 22K weighs just 2.89 oz. and measures only 4.5 inches, making it approximately 1.5 inches shorter and half an ounce lighter than the top-rated MS:22 while delivering exceptional sound performance.

Purpose-built for .22 LR platforms, the Quantum 22K features an integrated 1/2-28 direct-thread mount for a simple, streamlined setup. Its titanium construction delivers an exceptional balance of strength, durability, and minimal weight. Measured at just 108 dB at the shooter's left ear, the Quantum 22K delivers impressive sound suppression in an exceptionally lightweight, compact package.

FEATURES

- » Fully 3D-printed titanium construction
- » M-Kore™ Technology
- » Ultra-lightweight design
- » Compact overall footprint
- » Integrated 1/2-28 direct-thread mount
- » Comparable sound performance to the top-rated MS:22
- » No barrel length restrictions
- » Durable Cerakote finish
- » Designed for .22 LR platforms
